PROFILE

Highly proficient in Computer Science and Engineering, I specialize in Artificial Intelligence and Machine Learning, aiming to drive transformative impact through innovative coding solutions. Committed to empowering businesses and enhancing lives, I create innovative code that positively influences society. Eager to leverage my expertise, I seek opportunities to make a meaningful contribution to your organization. Dedicated to fostering professional growth and gaining valuable hands-on experience, I am ready to take impactful actions in the realm of technology.

SKILLS

- Python
- C & C++
- Data Structures & Algorithms
- Version control
- JavaScript
- Astro JS
- React JS
- Django
- DBMS
- Linux
- Problem solving

CERTIFICATES

- Python Google Certification
- Python - Cisco Networking Academy
- C language - Cisco Networking Academy
- Python and Django Full Stack Web Development - Udemy
- Machine Learning Foundation - NASSCOM
- J.P Morgan Chase & Co Software Engineering Virtual Experience
- HackerRank Skill Certifications in Python | Java | SQL | Problem solving basic | Problem solving Intermediate

PROFESSIONAL EXPERIENCE

Data Science Intern
Oasis Infobyte
September 2023 – October 2023
Applied statistical analysis and machine learning to real projects, fostering collaboration and delivering accurate insights.

Former Co-Founder & Director (Designated Partner)
Velopulent LLP
July 2023 – October 2023
Developing efficient software products, Empowering Individuals and Businesses Online.

EDUCATION

Bachelor of Technology (B.Tech)
Ace Engineering College, Hyderabad
2020 – 2024
Artificial Intelligence and Machine Learning
CGPA - 7.8

Intermediate
Narayana Junior College, Hyderabad
2018 – 2020
Percentage - 95.3 %

High School
Narayana high school, Hyderabad
2018
GPA - 10

PROJECTS

Dynamic Personal Portfolio Website
- Crafted and developed a dynamic portfolio website, meticulously designed to spotlight my proficiencies.
- Leveraged cutting-edge web technologies including Astro, TypeScript, and Tailwind CSS to construct a visually captivating and technically sophisticated online showcase.
- Visit https://adithya-krishna.com to explore this project, which effectively encapsulates my portfolio.

Real Time Room Chatting Web App using Django
- Developed a real-time chat web application using the Django to facilitate interactive room-based communication.
- This project demonstrates my proficiency in both front-end and back-end development. The front-end is built using HTML, CSS, Bootstrap, and JavaScript, ensuring an responsive user interface.
- The Django backend seamlessly manages user interactions, making the application efficient and secure.

Pizza Town Full Stack Web Development Project
- Executed a comprehensive Full Stack Web Development project, "Pizza Town," demonstrating proficiency in both frontend and backend technologies.
- excelling in frontend design with HTML, CSS, and JavaScript, ensuring an exceptional user experience.
- Meanwhile, backed by Django, proficient in data management and user authentication.
